

Pure Juice Workshop

Multi element isotopic data base

Pure Juice WP 9

Knud Schulz

SGF

Pure Juice Database

Main criteria of the Pure Juice Database:

- Easy to handle
- No further cost for software or user licences
- Easy to update and maintain
- Calculation of basic statistical values
- Functional output using different statistical graphs

Decision: database should be web based

Pure Juice Database

General facts:

- dynamic and web based
- no “addon’s” required
- contains isotopic and conventional data
- currently more then 6500 single values
- different statistical diagrams available (distribution, relation)

Pure Juice Database

Access to the data base:

- Pure Juice participants
- Governmental laboratories
- Commercial laboratories
- SGF member companies
- other interested third parties

Access only available after contribution (fee, data, etc...)
